

The Galactic Rush!

Navigating Complex Terrains

Business Need

In an ever evolving business landscape Leaders are dealing with information overload making it difficult to comprehend risks, manage crisis and explore new avenues for growth. Leaders need to enhance their teams' ability to think critically, evaluate & mitigate risks, and make informed decisions in order to be competitive.

The Experience

In "***The Galactic Rush!***" participants take on the role of explorers in global space research program, racing to discover the mysterious planet 'Zandria.' Their mission is to establish monopoly over 'Aqurite', a rare mineral with the potential to revolutionise life back on the 'Pale Blue Planet'.

This simulation mirrors real-world business challenges, pushing teams to critically evaluate information, anticipate risks, and swiftly adapt their strategies to succeed. The teams that demonstrate critical thinking, strategic decision-making, and resilience will emerge victorious.

Learning Outcomes:

Based on Kolb's Experiential Learning Cycle, this simulation is designed to enhance participants' abilities in:

Critical Thinking - Analyse situations, evaluate information and draw well-reasoned conclusions

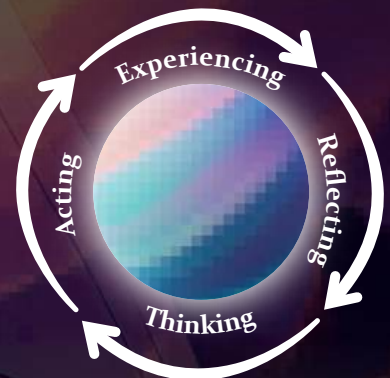

Decision Making - Make well-informed decision that align with goals and maximize value

Problem Solving - Gather, interpret, and leverage data to tackle complex issues, effectively
